

# MasterLine®

BY UNIVAR

BETTER PRODUCTS BY DESIGN.

MasterLine® Permethrin Plus-C is a high quality insecticide that has the unique 'Plus C' technology. Plus-C is a cellulose based additive that improves the performance of permethrin by protecting it from degradation. By creating an insecticide/cellulose barrier, professional applicators can improve their product performance while reducing the amount of permethrin needed for many jobs. Its superior efficacy and handling characteristics makes MasterLine® Permethrin Plus-C the smart choice for your toughest control problems.

MasterLine® Permethrin Plus-C meets the Univar commitment to high quality and customer satisfaction.
